

Coach Guide

A step-by-step guide to managing your coaching business.

A step-by-step guide to managing your coaching business.

1. Dashboard

Your home base. Shows active clients, pending check-ins, and a quick overview of your business.

2. Creating Dishes

Dishes are the building blocks of everything. A dish is a recipe with fixed portions and auto-calculated macros.

Your Dish Library

Go to **Dishes** in the sidebar. You'll see all your dishes with their category, calories, protein, carbs, and fat.

You can filter by category (Carbs, Protein, Fiber, Complete) and search by name.

Creating a New Dish

Click **Create Dish**. Fill in:

1. **Emoji** — visual identifier
2. **Dish Name** — include the portion size (e.g., "200g Quinoa", "Grilled Paneer 100g")
3. **Category** — what nutritional role this dish plays:
 - **Carbohydrate** — rice, roti, quinoa, bread
 - **Protein** — chicken, paneer, dal, eggs, fish
 - **Fiber** — vegetables, fruits, salads
 - **Complete Meal** — contains all macros (oats, smoothies, biryani)
4. **Food Items** — add ingredients with gram amounts. Use "Add Food" to search the database or "Custom" to enter your own.

Create Dish

N

■ Tips

- Different portions = different dishes ("200g Rice" and "150g Rice" are separate)
- Always include the amount in the name
- Macros are auto-calculated from ingredients

3. Diet Templates

Templates are reusable meal plans. Build them once, assign to multiple clients.

Template Library

Go to **Diet Templates**. You'll see all your templates with their plan type and creation date.

Building a Template

Click a template to edit, or **Create Template** for a new one.

Each template has:

- **Name** — e.g., "Muscle Gain — High Protein"
- **Plan Type** — Veg, Nonveg, Low Carb, or Intermittent Fasting

- **Meal Slots** — Breakfast, Lunch, Snack, Dinner (up to 6)

Each meal slot has **component rows** (CARB, PROTEIN, FIBER, COMPLETE). Click **+ Add Dish** to add dishes to a component. Multiple dishes in the same row = alternatives the client can choose from.

4. Managing Clients

Client List

Go to **Clients** to see all your clients with their status, goal, and join date.

Adding a Client

Click **Add Client**. Enter their name, email, and goal. They'll receive login credentials.

Client Detail Page

Click any client to see their full profile with tabs:

- **Overview** — weight, check-in count, progress chart
- **Profile** — onboarding questionnaire answers (diet preferences, lifestyle, goals)
- **Diet Plan** — their assigned diet plan (edit, remove, or reassign)
- **Workout** — their assigned workout (edit, remove, or reassign)
- **Measurements** — body measurements over time
- **Habits** — daily habits you've assigned

Assigning a Diet Plan

From the client's **Diet Plan** tab, click **Assign Plan**. This takes you to the plan creation page where you can:

- Start from scratch
- Pre-fill from an existing template (the template stays unchanged — you're creating a copy)
- Customize meals for this specific client
- Click **Create & Assign Plan**

Assigning a Workout

Same flow from the **Workout** tab. Pick a template or build from scratch, then assign.

5. Workout Templates

Go to **Workout Templates** to manage your workout library.

Each template has workout slots (e.g., "Push Day", "Pull Day", "Legs Day") with exercises. Each exercise has sets, reps, rest time, and optional notes.

6. Daily Log

Go to **Daily Log** to see what your clients ate today.

For each client who checked in, you'll see:

- **Macros** — total calories, protein, carbs, fat
- **Adherence** — what % of their plan they followed
- **Meals** — exactly which dishes they selected, grouped by meal
- **Weight** — if they logged it

You can **Review** each check-in and optionally add feedback that the client will see.

The "Missed" tab shows clients who haven't checked in today.

Quick Reference

Section	What it does
Dishes	Build your recipe library with macros
Diet Templates	Create reusable meal plan structures
Workout Templates	Create reusable workout structures
Clients	Manage clients, assign plans, track progress
Daily Log	Review what clients ate today
Weekly	Review photo check-ins
